

# Soft starters

*VLT® Soft Start Controller MCD 100*

## **VLT® Soft Start Controller MCD 100**

The compact soft starter series is a cost-effective alternative to traditional contactors and can also replace star/delta combinations. The ramp time and the starting torque and kick start are adjusted via controls on the front of the unit.

### **Almost unlimited number of motor starts**

For a power rating of up to 25 A, up to 480 starts per hour are possible. This is a true "fit and forget" soft starter for DIN rail mount. The unique contactor design allows an almost unlimited number of starts per hour without derating.

### **Technical data**

Input..... 3 x 208-600 V  
Control voltage ..... 24-480 V AC or DC  
Power..... 0.1 kW-11 kW (25 A)

### **Enclosure**

IP00	IP20	IP21/Type 1
